Senior Technical Writing Manager | Enterprise Developer Documentation | Docs-as-code

Summary

I help enterprise software organizations deliver developer documentation at scale, through people management, hands-on content delivery, content strategy, docs-as-code approaches, and release alignment. At HERE, I managed documentation for an enterprise browser and SDK platform serving financial-services firms and other enterprise customers, leading a team while building a GitHub-based docs-as-code workflow and integrating documentation with product development processes, increasing release-aligned publication to 100%. My 15+ years span developer and administrator guides, API and integration guides, security topics, information architecture, and cross-functional collaboration with product and engineering teams.

Professional Experience

MTP | Remote
Senior Technical Writer, Chrome Developer Social Content
June 2026 – Present

Create technical content for Google's Chrome for Developers social media, transforming complex web platform APIs and browser features into developer-focused content across social channels.

- Author, refine, and verify technical content covering web platform APIs, browser capabilities, Chrome Developer Tools, and related developer technologies.
- Use AI assistance to accelerate content and code example development while validating technical details against W3C specs, MDN, and Google's technical content.
- Deliver accurate, audience-appropriate technical content aligned with Chrome's developer advocacy goals and content strategy, through collaboration with developer relations, design, marketing, and production teams.

HERE (here.io, formerly OpenFin) | Remote
Head of Documentation
Nov 2020 – Feb 2026

Led documentation strategy and delivery for HERE's enterprise browser and SDK platform serving developers, administrators, and business stakeholders at financial-services and other enterprise organizations. Combined people management with hands-on developer content authorship, docs-as-code engineering, and cross-functional release coordination.

- Managed a small team of technical writers, including hiring, mentoring, performance reviews, career support, and workload allocation.
- Owned documentation strategy, roadmap, and prioritization across multiple audiences using product changes, customer feedback, and support insights to guide investments.

- Integrated documentation into the software development lifecycle, through partnership with product, engineering, and QA, increasing release-aligned publication from 93% to 100%, reducing post-release documentation debt.
- Planned and led migration from SaaS to a docs-as-code architecture (GitHub, GitHub Actions, Docusaurus, TypeSense), aligning documentation workflows with engineering practices.
- Developed and maintained API and SDK documentation, integration guidance, administrative workflows, product concepts, and onboarding guides.
- Established documentation standards, editorial and technical review practices, and information architecture to improve consistency, maintainability, and discoverability across multi-audience documentation.
- Remained hands-on with technical research, product testing, content development, and editorial reviews while managing team priorities and release commitments.

Mozilla | Remote
Staff Technical Writer
Jan 2020 – Aug 2020

- Authored and maintained developer documentation for web platform technologies and Firefox Developer Tools, including CSS and security topics, for MDN Web Docs.
- Researched evolving web technologies and worked directly with Firefox engineers to ensure technical accuracy and synchronization with product releases.

Developer programs and documentation community leadership roles
Mar 2013 – Dec 2019

- Led MDN's global open-source documentation community, coordinating staff and volunteer contributors to expand API reference and conceptual guide coverage for emerging web platform technologies.
- Facilitated Agile planning and delivery for distributed documentation and development teams using Large Scale Scrum (LeSS), coordinating sprint cycles and release synchronization across 9 time zones.
- Developed scalable contributor practices and coordinated documentation initiatives across a globally distributed technical community.

Technical Writer/Community Steward
Jun 2010 – Feb 2013

- Authored, reviewed, and edited documentation for open web standards and browser technologies.
- Coordinated volunteer documentation contributors and led focused documentation sprints to improve content coverage and quality.

Lombardi (IBM acquisition) | Austin, Texas
Senior Information Developer
2009 – 2010

- Planned and authored administrator and business analyst documentation for Teamworks business process management software, covering enterprise workflow configuration, using DITA and related structured-authoring tools.
- Built a proof-of-concept business-process application for creating and maintaining reusable proposal content, integrating DITA content with metadata-driven approval workflows.

Enthought | Austin, Texas
Senior Technical Writer
2004 – 2009

- Planned and authored API references, developer guides, and end-user help for custom scientific applications and Python libraries used by developers and technical domain experts (geophysicists and materials engineers).
- Developed corporate documentation standards, a style guide, and reusable templates.
- Built a Python integration with the RoboHelp API to deliver cross-platform, context-sensitive help.

Technical and Documentation Skills

- **Documentation leadership:** People management, hiring, mentoring, performance management, content strategy, roadmaps, prioritization, stakeholder partnerships, content governance
- **Developer and enterprise documentation:** API references and SDK documentation, developer tools, technical integrations, web platform APIs, administrator documentation, technical research and product validation
- **Documentation engineering:** Docs-as-code, Git, GitHub, GitLab, GitHub Actions, Docusaurus, TypeSense, Markdown, JSDoc, TypeDoc, Sphinx, reStructuredText, DITA XML
- **Documentation operations:** Agile/LeSS process facilitation, SDLC integration, release-aligned documentation delivery, information architecture, standards and governance, contributor workflows
- **Technologies:** JavaScript, TypeScript, Python; HTML, CSS, browser APIs
- **Audiences:** Software developers, administrators, technical domain experts, business stakeholders

Education and Certification

- Certified LeSS Practitioner® — The LeSS Company B.V., 2018
- Technical coursework — University of Texas at Austin and Austin Community College: Data Structures, Analysis of Programs, Java Programming
- University of Chicago — B.A. in Humanities
